Site is a blocky <sup>Composite</sup> structure ~~with~~ <sup>with</sup> different levels and separate areas. Inside one portion is a large room w/ tables & people concentrating & clustered around a table. There is equipment, metal & glass, and glass-fronted cases which are arrayed along walls; contain loose & hanging objects, & metal supports. Give the sense of display, storage, preservation & protection. An authority figure is the focus of attention of a group of people with some common element among them. The Authority figure is instructing the group on objects on table, normally kept in cases. Objects of interest in case are heavy, metal, oily, & have wood parts; there is writing on different color backgrounds in the cases. Objects suggest an AOK of "Weapons," in that they can be assembled/disassembled; are potentially dangerous, are metallic, small oily, have various metal parts & rounded surfaces, must be "set up" & "oriented" properly.

# Approved For Release Museum Takes Aim At Gun History

For 7-year-old James Monroe Davis, swallowing a bitter spoonful of medicine was one of life's most dreaded evils. This time, he required more coaxing than usual. Take the medicine, his father said, and he would get a surprise.

The bribe worked. Young Davis opened, swallowed, and collected his reward—a boy's .410 gauge shotgun that cost \$1.50 in 1894. That was the beginning of a firearm collection Davis spent the rest of his life assembling. More than 20,000 firearms and related artifacts are now housed in the J.M. Davis Gun Museum in Claremore, Oklahoma.

Visitors can walk for a mile through the collection, viewing some relics that date far back, such as a 14th-century, hand-held cannon from the Orient. Along with the guns, the museum also has large collections of antique German steins, Indian artifacts, World War I posters, and John Rogers statuary, popular during the Victorian period. Rogers' sentimental portrayal of everyday people is similar to Norman Rockwell's works.

Davis moved to Oklahoma in 1916, after trading several thousand acres of Arkansas timberland for the Mason Hotel in Claremore. He worked the desk at night, which afforded him ample time for his passionate hobby. Gun collectors from all over the world journeyed to Claremore to trade pieces and information with the noted authority at the small hotel.

Before long, the lobby, hallways, dining room, and seven upstairs rooms were filled with firearms. At the entrance to the museum stands the old key box and registration desk, with dozens of guns arranged geometrically above it just as they were in the hotel lobby.

"On rainy afternoons, my wife and I would farm out our children and go to the hotel. We would spend hours looking at the guns, until our necks gave out," says Lee Good, who has been with the museum since it opened in 1969.

The collection spans the history of firearms from the mid-1300's and basically stops with weaponry from World War II. There are ornately decorated pistols, as well as handguns so small they can be hidden in a woman's palm.

Muzzle-loading rifles and Colt pistols, which played major roles in the history of this country, take up much of the collection. The muzzle-loading firearm was a primary weapon during the American Revolution, War of 1812, and Civil War.

At the J.M. Davis Gun Museum in Claremore, Oklahoma, weapons belonging to Bonnie Parker, John Wesley Hardin, and Pretty Boy Floyd are seen in the Gallery of Outlaw Guns.

Later, along with the Winchester rifle and Colt revolver, it helped settle the West.

There are about 1,000 Colt firearms in the collection, including a rare Walker Colt, manufactured in 1847. Following the advice of Texas Ranger Samuel Walker, the Colt Patented Firearms Company designed a pistol for mounted troops. The result was the .44 caliber model with a 9-inch barrel that weighs almost 5 pounds. The Walker Colt can be fired six times without reloading.

Many of the firearms feature unusual design styles. The wide-muzzled blunderbuss was used in the late 1700's and early 1800's. The muzzle of the largest one that's on exhibit measures more than 4 inches in diameter.

"The design of the blunderbuss was strictly a psychological thing," says Good. "It didn't scatter the shot like the muzzle suggests."

Many of the pieces indicate the gun-makers were expert craftsmen. One of the most ornate models is a rifle with a Miquelet lock mechanism, a style that originated in Spain around 1600. The gun is decorated with more than 50,000 pieces of natural and stained ivory, brass, and gold inlays. Another piece designed primarily as a work of art is a 17th-century German crossbow. Ivory, bone, and mother-of-pearl inlays form signs of the zodiac and other celestial figures along the stock.

The smallest gun in the museum is the

*The stock of a 17th-century German crossbow is decorated with ivory, bone, and mother-of-pearl.*

Kolibri, which weighs only 2.5 ounces and fires miniscule 2.7 mm cartridges. The largest is an .82 caliber musket made in China. The overall length of that gun is 8 feet, 10 inches.

Almost everyone who visits the museum is eventually drawn toward the Gallery of Outlaw Guns, to view firearms once used by such infamous owners as Pancho Villa, John Wesley Hardin, Pretty Boy Floyd, and Bonnie Parker.

The museum, at 333 North Lynn Riggs Blvd., is open daily from 8:30 a.m. to 5 p.m., and from 1 to 5 p.m. on Sunday. Additional information on the collection is available by writing to J.M. Davis Gun Museum, Box 966, Claremore, Oklahoma 74018; or call (918) 341-5707.
