Interior Summary

Site is a structure/land/sand/water interface, highly suggestive of a recreational beach-type area. Some important structures are located "behind" the beach-like area. One structure is large, empty and possibly domed, reminiscent of an airplane hangar. ~~Some~~ Colorful, Beachy, that people are present at the beach-like area; others are walking, perhaps sightseeing in the large building. The area with the bldgs is well kept, & engineered for an open, aesthetic ~~feature~~ inspection. Primary purpose of site is varied types of recreation. A sense of "segregation" or "dividing up" is present, involving such things as people, groups, skill levels, etc. Sightseeing is also important.

Coney Island

Facing the Atlantic, Coney Island has a fine beach and boardwalk. Over the last few years it has become a place of high rise apartment buildings. Scattered among these highrises are 1-2 family homes of some 100,000 persons of diverse ethnic and native origin. This housing ranges from slum to middle class.

Besides beach and boardwalk, many carnival amusement features on Surf Avenues draw a host of visitors, especially on Summer weekends. The NY Aquarium, with about 7,000 specimens of marine life is located on the ocean front.
