

Clearwater Lake UFO

Interesting data ;-)

Your target was : "Clearwater Lake, Missouri, March 27 1973 - UFO sighting in the Dam and Reservoir area"

The specific tasking is at home which i will have to check out as i think i wanted the viewer to merge with the craft and its occupants.

Well done ;-)

Target:

CXTP-0814

Viewer: Daz Smith

Method: CRV (loose)

Information: Blind

Date: January 14, 2009

The target feels like:

Structure, motion, space

The structures is;

Hard, slick, curved, formed and manmade.

Complex. Formed and designed.

The structure feels white and of a slick/smooth material.

Feels technological or modern.

The structure feels like it has two parts to its outside curved shape. Inside there seems to be a complex order of parts all which feel manmade.

The structure feels like it is movement based and moves upwards at great speed/'velocity' was used.

The movement is;

Fast, explosive, upwards, like an energy release after a build-up.

Like the release of energy from a coiled spring - an expression.

The movement feels like it's within a very large, dark, space.

In Summary;

This feels like an event that was watched and anticipated.

This involved a manmade structure that was built and designed for high speed and distant travel using the best technology available.
