**The target feels like:**

A life that has some kind of build-up or obstruction in a main tube or organ internally.

**The life has symptoms of;**

Depression, Pain, fatigue, lethargy and constipation.

I also feel a weight loss may be involved with the illness.

**The main area of interest is:**

Heavy, wet, glistening, thick/dense, grey and feels uneven – bubbly in form.

It feels like a good couple of handfuls in size. But heavy.
