What is Remote Viewing?

Controlled Remote Viewing (CRV) is the only **scientifically-validated, trained skill** which enables a person to **perceive objects, persons, or events at a location distant in either space or time**. It has been described as a 'martial art' for the mind. **No shielding can prevent** a properly-trained remote viewer from gaining **access to the target!**

Do I have to be "gifted" to learn it?

No. Anyone can learn it.

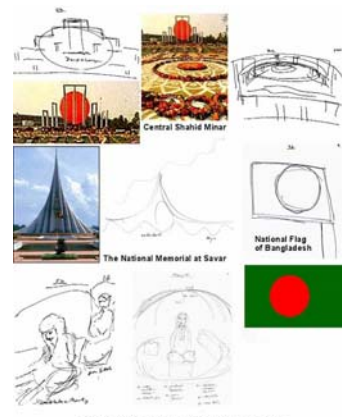

How well does it work?

Experienced viewers regularly obtain extremely accurate information from the target **and retrieve information indicating that they were "there"**.

Novice Remote Viewers often **surprise themselves at the accuracy of their sessions.**
