

Target 6688-2100  
City of Mecca

Task: Describe the topography of the site and the most important aspects of this location.

Mecca, also transliterated as Makkah, is a city in the Hejaz and the capital of Makkah Province in Saudi Arabia. According to Islamic tradition, the history of Mecca goes back to Abraham when he built the Ka'aba with the help of his son Ishmael around 2000 BC. Mecca is also home of the second tallest building in the world, The Abraj Al-Bait Towers, also known as the Mecca Royal Hotel Clock Tower, is a government-owned building complex in Mecca, Saudi Arabia.

The target is a location that has a something sticking out that is tall and people can see it from a distance and can drive to it, but they don't stop. They like it as a destination that goes on through to other places it's a stop along the way. The location is not what it used to be but it still stands
