Summary

The Target is land with a man made, life, water
 and motion

the land appears to have a grassy green area
 with paving of some sort. In this scene is
 a body of water very deep, very blue. There
 is a construction that is white very tall.
 There is also a construction that is
 material like also white.

There is a fat jolly male energy with
 frizzy (static shocked) like brown hair, wearing
 a brown/black material, also white

There is electrical energy in the environment
 constantly arcing.

~~AOL~~

AOL - D BK
Space Shuttle!

Target made me feel like moving scenery was present. This Target is a structure having a wide array of sensory descriptors. It is in an open area surrounded by sand, water and vegetation. People were present, most notably some in an enclosed place. The structure ~~that~~ itself contains lots of vertical metal laticework like an antenna tower guides or tracks were present to haul people in a container like an elevator, train car or roller coaster. Two ships appeared to me off the shoreline, a large ship flanked on the right rear by a ship half its size, but that they were not the target. I saw a person on a motorcycle going through huge very very tall hanger doors, the ^{tallest} ~~largest~~ hanger doors I have ever seen. That was nearby. Intermittent spraying water or liquid was present at the target. Billowing flowing gasses, rotating twisting cantilevers, conical fluted shapes, vibrations shaking roaring followed by quietness, gave AOL's of "Like a fire, like a swing bridge over a river, like rocket nozzles. A panoramic view like the east coast of the U.S. Appeared.

I feel the target is a transport vehicle of some sort. There was lots and lots of very very bright light at the end then an overwhelming AOL of the space shuttle appeared and I could not get rid of that AOL.
