Summary

There is activity by lifeform in a
confined area. The activity is being watched
by people. ~~the~~ sounds are associated
with the activity - not caused by the activity.

Session: 3:12, PST

Session Summary:

The target has elements of:

- Motion/energy
- Sound
- Biological
- Man-made

The motion/energy seems to:

- be smooth, easy moving
- be fast?
- be irregular, in that it is on-off or stop-start
- go in an upward motion or direction
- be difficult for its "originating factor"
- be done inside a structure
- be done at night
- be done by a female human
- be of short duration - completed

The land:

(8)

- is open
- smooth in that it is fairly flat
- uneven in areas
- natural (not paved, e.g.)
- has a lonely feel
- is windy
- is interesting
- has thistles
- is a big area
- has an aspect that is grainy/fine, perhaps this is a sandy area
- is veiled at night or in dark
- has an edge: perhaps a cliff or steep hill
- may have one end of area higher than the other
- is accessed by a gate
- has some type of directional indicator

The biological:

- is small
- human
- female
- likes what she is doing
- is happy
- is in a pleasant state of mind
- is engaged in an activity
- is inside a man-made structure
- is really "going at it."
- may have a female adult with her

The man-made:

- is a structure - a building
- is big
- is old
- is sturdy
- is up high
(connotation if it is a high structure or in a high place)
- is rectangular
- is visible at night
- is dark outside
- is light inside
- is tall
- is wooden
- is cold or in a cold location

Man-made (con't)

10

- has an edge
- has an entrance
- has a cornerstone or foundation
or is on stones/blocks
- has a pleated or stripped appearance
- has red color or some red
on it
