FOREWORD

This remarkable bibliography was given to Christopher Bird by one of the authors, Larissa Vilenskaya, a Russian engineer and psi researcher, when she was in New York recently for a meeting. It represents some ten years of dedicated labor by herself and Edward Naumov, and cites references as recent as early 1980. It covers most of the publications in the USSR in "psychotronics, psychoenergetics, psychobiophysics and related problems," to use their words, and is arranged by topics.

The PA, recognizing the value of this unique document and the fact that it has not been published, even in Russia, arranged to have it translated. The Parapsychology Foundation agreed to assist with the publishing costs, so that it can be made available at a nominal price to the scientific community and others interested in this field. We are all indebted to the Foundation for their willingness to do so.

Ian Stevenson and Emily Williams undertook the considerable chore of carefully proof-reading the entire manuscript. They found a large number of editorial problems, most of which have been corrected by hand. A few discrepancies between different spellings of the apparently same name were unchanged, where the correct spelling could not be determined. Some symposium titles were not translated, and some editorial niceties such as conventional punctuation and syllabification of broken words were left where it was felt the hand correction would be more of a distraction than a benefit. Where a symposium or collection is translated in the first citation but not later, the earlier translation is cited thus: "(cf. #55)."

Moscow BIBLIOGRAFIYA PO PARAPSIKHOLOGII /PSIKHOTRONIKE, PSIKHOENERGETIKE, PSIKHOBIOFIZIKE/ I SMEZHNYM PROBLEMAM in Russian 1979 pp 1-116

[Book by E. K. Naumov and L. V. Vilenskaya, 116 pages]

CONTENTS

Part I. PARAPSYCHOLOGY, PSYCHOTRONICS, PSYCHOENERGETICS AND PSYCHO-BIOPHYSICS

I. General Problems

1. Articles in Encyclopedias and Dictionaries	1
2. Experimental and Theoretical Investigations	2
3. Physical Hypotheses	9
4. Popular Science Literature	13
5. Criticism of Parapsychological Investigations	34

II. Biophysical Effect

1. Experimental and Theoretical Investigations	40
2. Popular Science Literature	47

Part II. RELATED AND BOUNDARY PROBLEMS

I. Brain Potential	51
II. Cutaneous-Optic Perception	55
III. Parapsychology and Medicine /Nontraditional Methods of Therapeutic Effect on the Human Organism/	
1. General Problems. Bioenergotherapy	65
2. Acupuncture	69
3. Biostimulation With Monochromatic Red Light	78
4. Yoga System	85

- a -

5. Psychic Self-Regulation	96
IV. Living Organism and Energetic Environmental Factors	
1. General Problems	105
2. Effect of Electric and Magnetic Fields	109
3. Effect of Space Factors. Biorhythms. Heliobiology	125
V. Radiation of Living Organisms	
1. Radiation of Biological Objects in Visible and Ultra-violet Range	136
2. Electric and Magnetic Fields of Biological Objects	143
VI. Methods of Investigation of Bio- and Psychoenergetic Processes	
1. General Problems	148
2. Kirlian Effect	153
VII. Miscellanea. <u>Literature on Related Problems Not Included in the Other Sections</u>	159
Appendix. Articles by Soviet Authors in Collections of International Conferences on Psychotronics	165
Supplement to Bibliography	169
Supplement to Bibliography	171

Part I

PARAPSYCHOLOGY, PSYCHOTRONICS, PSYCHOENERGETICS AND PSYCHOBIOPHYSICS

I. General Problems

1. Articles in Encyclopedias and Dictionaries

II. Biophysical Effect

In accordance with the decision of the Interdepartmental Commission on this problem, as of June 1979 the terms biophysical effect and biophysical method were replaced with biolocation effect and biolocation method
