

## Target 1409 – 0101 – NBA playoff

Remote Viewer:	Daz Smith
Method:	CRV
Protocol:	<b>BLIND</b> – I had no information on this target other than the number
Date:	14 October 2010

During a discussion on the 8<sup>th</sup> September 2010 we decided to do a predictive target for the following week. We decided that just before meeting the following week Dan would pick a random news event of some kind and this would be the target. We as remote viewers were to just do a target anyway to see if we could predict what target Dan would eventually pick.

For this target I had no info upfront and didn't even have the standard random number to use as a focus –I just made one up myself.

On the 16<sup>th</sup> September, Dan gathered and created the feedback for this target and presented it to the class later that day.

This means that I did my remote viewing in advance of the target being picked.

Take a look at the remote viewing and the feedback to what target was chosen for yourself.

On the evening of Tuesday, September 14, in Seattle, Washington (USA) the WNBA (Woman's National Basketball Association) held a playoff game to decide who the league champions are. The first team to win three games gets to claim to be the champions. Seattle won both games so far and need one more win to beat the Atlanta Dream for the crown.

The tasking is: this is an event, describe the event.. The event is woman playing basketball. Describe their physical activities.

The game was played at the Seattle Storm's home court called 'Key Arena' in Seattle.

Here is a link to a video on the target.
