[http://www.lauralee.com/chi\\_pyr.htm](http://www.lauralee.com/chi_pyr.htm)

The first photo of a Chinese pyramid was taken in 1945 at the end of World War II. This White Pyramid is located in the Qin Ling Shan mountains about 60 miles Southwest of Xi'an. The photo was in the files of the US Military for 45 years before it became public knowledge.

The biggest breakthrough came when Hartwig Hausdorf a writer and author from Germany, was able to visit some of the restricted areas in china, he then found and photographed a large number of pyramids. Hartwig Hausdorf has written his own account of his visit to china, as well his ideas on the Pyramids. These can be found, on the [Extraterrestrial legacy](#) web site.

As we can see from the photographs the pyramids in china are as large as any that can be found in Egypt, Mexico and any other part of the world.

These images and others that become available over time, will help all researchers of the ancient world to piece together our past. I would expect any new ideas to be as controversial and wide ranging, and probably have similar lines to the one's we have already seen, for other pyramid sites around the world.

---

The main Pyramid areas are on the Qin Chuan Plains in central China.

Qin Lin Valley

Qin Ling Shan Mountains - 100km SouthWest of Xi'an

Moa Ling - Near Xianyang township 50km West of Xi'an

Wei Ho River - North of Xi'an (Chinese Imperium)

Stensi

Shandong - Stone Pyramid

Taibai Shan Mountain - 10,000ft highest point in the Qin Ling Mounta
