HEAT

Summary

Feel like this is an event involving lifeforms. There is speed & movement associated with target as well as some sort of energy output or huge release of energy at the target.

Heat, H₂O, Fire, explosion or combustion of some kind. Keep getting circular feel

There is a feeling of 'Dryness' here. Like a desert of some kind. Brown yellow colour.

Focusing on lifeform /
get nothing but death!

The heat here is
ferocious. Sketches indicate
circular feel. I want to
say the sun but there is
the look and Solid feel to
the target. Just a large
release of energy and
explosion

End
